The Health and Science Pipeline Initiative (HASPI) is a collaborative network of K-16 educators, industry representatives, and community organizations that are actively engaged in the common effort to improve students' ultimate success in healthcare.

### **Health and Science Pipeline Initiative**

Bird anatomy, or the physiological structure of birds' bodies, shows many unique adaptations, mostly aiding flight. Birds have a light skeletal system and light but powerful musculature which, along with circulatory and respiratory systems capable of very high metabolic rates and oxygen supply, permit the bird to fly.

### **Bird anatomy - Wikipedia**

The history of anatomy extends from the earliest examinations of sacrificial victims to the sophisticated analyses of the body performed by modern scientists. The study of human anatomy can be traced back thousands of years, at least to the Egyptians, but the science of anatomy, as we know it today, did not develop until far later.
