SoilStructure Software team is comprised of licensed engineers and graduate computer programmer. Our experience is in Substructural Engineering, Geotechnical Engineering and higher level computer languages.

Drilled Pier (Bored Pile) Software - SoilStructure Software

An experimental study of the effect of (initial) static shear stress on the undrained simple shear response of sands is presented. Liquefaction resistance of two sands, one generally contractive and the other dilative, over a wide range of density and effective stress levels was evaluated at various density and stress states. At a given density, the effect of static shear on the cyclic ...
