a) Structure Q H F K 5 V n The Similitude Concept states that if the nominal stress histories in the structure and in the test specimen are the same, then the fatigue response in each case will also be the same and can be described by the generic S-N curve.

Advances in Fatigue and Fracture Mechanics

PREFACE Metal fatigue is a process which causes premature failure or damage of a component subjected to repeated loading. It is a complicated metallurgical process which is difficult to accurately describe and model on the microscopic level. Despite these complexities, fatigue damage assessment for design of components and structures must be ...

Fundamentals of Metal Fatigue Analysis: I.D. # 94024: Duration: 3 Days: There is a potential for metal fatigue in any situation where a component is subjected to cyclic loads. Fatigue failures of various types are a key concern in increasing the reliability of products. Problems involving fatigue have become more severe with the demand for lighter weight structures and components. The ...
