For the pressure reduction and metering stations, the main equipment includes filters, heaters, pressure reducers and regulators, and flow metering skids. In addition, each station is generally equipped with drains for ...

### **Fundamentals of Gas Pipeline Metering Station | Natural**

Gas flow meter station design using conventional flow meter elements such as orifice or turbine is a reasonably well-known subset of practices. Designing ultrasonic meter stations is now an applied practice by some but is still a new endeavor to many. There are many common sense practices that should be adhered to on any meter station designed and the ultrasonic station is no exception ...

Gas Metering Station and SCADA System Bucharest, 23.06.2011. Content OMV Petrom SA Gas Metering Stations and SCADA System Business Division Gas Metering and Gas Quality Department. 3 Gas Metering Stations Petrom: leading oil & gas player in SEE, high degree of physical integration Exploration and Production. Refining and Marketing. Gas and Power 4.6 mn t Group crude oil and NGL production 5.2 ...

### **Gas Metering Station and SCADA System - Petroleum Club**

High gas pressure reducing-metering stations were designed for both gas pressure reducing and gas flow metering. The range of inlet pressure: 0.4 – 10.0 MPa The range of outlet pressure: arbitrary In the range of foregoing pressures we construct stations of arbitrary flow capacities and various configurations: in locker, in brick building or without locker. Standard stations are built in two ...

## **HIGH GAS PRESSURE REGULATING AND REDUCING-METERING STATIONS**

SCOPE The Factors in Gas Meter Station Design and Operations Course will provide information that engineers, and senior field technicians with similar duties, will be able to use to design and operate natural gas flow metering facilities with

### **Factors in Gas Meter Station Design & Operations Short Course**

available gas metering technologies is beyond the scope of this paper, but information of that type can be found in other papers in these Proceedings. GENERAL CONSIDERATIONS There are several basic considerations that should always be kept in mind when designing a gas metering station. These include: • Desired flow measurement accuracy • Range of flow rate or load • Quality and ...

### **METER SELECTION FOR VARIOUS LOAD REQUIREMENTS**

An orifice meter is a fluid flow measuring device that produces a differential pressure to infer flow rate. The meter consists of the following elements (see Figure 1-1): The meter consists of the following elements (see Figure 1-1):

Actaris Gas is a major business line of the Actaris Group, an established global leader in metering products and systems for distributing gas, electricity, water and heat.

### **Gas Regulation Overview - ControlTrends**

natural gas pipeline network, with almost 95% of U.S. natural gas imports coming from Canada. At present, the gas pipeline infrastructure is more developed between Canada and the United States than between Mexico and the United States. Gas flows from Canada to the United States

### **Natural Gas TM - Argonne National Laboratory**

The metering facilities must provide accurate and continuous gas measurement. Some meter stations also regulate gas pressure and delivery volumes and are called meter and regulator stations (M&R). Pressure regulation equipment ensures that gas delivered into or out of a pipeline system is maintained within a specified pressure range. This is ...
