The ionosphere (/ aÉª Èˆ É' n É™ Èœ s f ÉªÉ™r /) is the ionized part of Earth's upper atmosphere, from about 60 km (37 mi) to 1,000 km (620 mi) altitude, a region that includes the thermosphere and parts of the mesosphere and exosphere. The ionosphere is ionized by solar radiation. It plays an important role in atmospheric electricity and forms the inner edge of the magnetosphere.

Ionosphere - Wikipedia

The choice of the metal conductor to be used in an electrodynamic tether is determined by a variety of factors. Primary factors usually include high electrical conductivity, and low density. Secondary factors, depending on the application, include cost, strength, and melting point.

Electrodynamic tether - Wikipedia

This article discusses the history of quantum physics, beginning with an analysis of the process through which a community of quantum theorists and experimentalists came into being. In particular, it traces the roots and fruits of Max Planck's papers in irreversible processes in nature. It proceeds by exploring the origin and subsequent development of Niels Bohr's so-called "planetary ...

Nota del curatore del sito. Le affermazioni relative alla variazioni della Risonanza Schuman fatte nel 95 da Gregg Braden nella conferenza "Risvegliarsi al Punto zero" non sono state confermate dall'evidenza dei fatti. Sono passati oltre 10 anni da quella conferenza e possiamo dire con certezza che non c'è mai stata alcuna variazione oggettiva della frequenza di Schumann.
