An eyepiece, or ocular lens, is a type of lens that is attached to a variety of optical devices such as telescopes and microscopes. It is so named because it is usually the lens that is closest to the eye when someone looks through the device. The objective lens or mirror collects light and brings it to focus creating an image. The eyepiece is placed near the focal point of the objective to ...

Eyepiece - Wikipedia

Space Information Space is big, dark and cold. There is no air or water in space. Astronauts explore space in specially designed spacecraft called spaceships. Robots are also used to explore space. The only place in space that people have been to is the moon. Some people think that there may be life on other planets. Planets are in outer space.
